

ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE

Russell Overseas Equity Class

JUNE 30, 2011

This annual management report of fund performance contains financial highlights but does not contain the complete audited annual financial statements of the Class. You may also obtain an additional copy of the annual management report of fund performance and the annual financial statements by visiting our website or SEDAR's website at www.sedar.com. You can request a copy of the Class's proxy voting policies and procedures, proxy voting record or quarterly portfolio disclosure at no cost by: calling 1-888-509-1792; visiting our website at www.russell.com/ca; or writing to us at: Russell Investments Canada Limited, 100 King Street West, 1 First Canadian Place, Suite 5900, Toronto, Ontario M5X 1E4.

This report may contain forward-looking statements about the Class, its strategy, expected performance and condition. Forward-looking statements are statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "plans", "believes", "estimates" or negative versions thereof and similar expressions. In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risk, uncertainties and assumptions about the Class and economic factors. Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Class. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors, interest and foreign exchange rates, capital markets, business competition, technological change, changes in government regulations, unexpected judicial or regulatory proceedings, and catastrophic events.

We stress the above-mentioned list is not exhaustive. We encourage you to consider these and other factors carefully before making any investment decisions and we urge you to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Class has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise.

Russell Overseas Equity Class

Annual management report of fund performance

Investment objective and strategies

The Class's investment objective is to provide total return and additional diversification for Canadian investors primarily through exposure to equity securities of non-Canadian and non-U.S. companies listed on recognized stock exchanges, and fixed income securities and financial instruments issued by non-Canadian and non-U.S. governments and companies.

To achieve this objective, the Class invests in units of the Russell Overseas Equity Pool (the "Underlying Fund").

The Class's investment in the Underlying Fund provides access to diversification that allocates among asset classes, investment styles and sub-advisers.

The current benchmark of the Class, against which its performance is compared, is the Russell Developed ex-North America Large Cap Index Net ("Benchmark"). Each sub-adviser may have a different sub-adviser benchmark allocated to it in respect of the assets of the Underlying Fund managed by that sub-adviser that better reflects the investment style or market segment of that sub-adviser.

Results of operations

For the twelve-month reporting period ending June 30, 2011, the Russell Overseas Equity Class (the Class) returned 16.12%*, while its Benchmark, the Russell Developed ex-North America Large Cap Index Net, returned 18.79%.

During the reporting period, the Class's net assets increased by \$5.9 million, as a result of a \$4.7 million gain relating to investment holdings, net subscriptions of \$1.8 million and a net investment loss of \$0.6 million. Net investment loss is comprised of total investment income earned by securities less the expenses of the Class. The Class's expenses increased by \$102 thousand (approximately 22%) from the previous period's expenses. The increase is mainly due to an increase in management fees paid as a result of the higher net assets of the Class and the implementation of the Harmonized Sales Tax (HST) on July 1, 2010.

The second half of 2010 was a period of bullish sentiment and strong performance in overseas markets with both the Underlying Fund and the Benchmark delivering returns in excess of 20%. However, in the latter half of the reporting period, against a backdrop of the ongoing European debt crisis and increasing concern about its potential impact on the global financial system, investors favoured less risky investments and returns were more modest. Inflation fears in emerging economies also weighed on investors' minds making developed markets more attractive for investment when compared to emerging markets.

Overall, it was the growth characteristics of companies that drove stock market performance for the period. In this environment, sub-advisers focused on future growth prospects rather than on finding companies with undervalued share prices benefited. However, a shift in the type of growth that was rewarded occurred in the first half of 2011 with investments in companies exhibiting stable growth being rewarded while those having high, expected future growth were not. In addition, shares of companies demonstrating the potential for accelerating growth over the long term (long-term momentum stocks) were preferred while companies showing the potential for accelerating growth in the short term (short-term momentum stocks) detracted from performance. In addition, investors preferred larger companies with less leverage during the reporting period, most likely due to the increasing uncertainty around financial markets in the last few years.

Arrowstreet Capital, Limited Partnership outperformed the Benchmark for the 12 months ending June 30, 2011 and was the best performing sub-adviser in the Underlying Fund for the reporting period. Arrowstreet added the most value with an underweight to Japan and good stock selection in this region. Despite enduring an earthquake and subsequent tsunami in March 2011, Japanese consumer discretionary stocks actually performed well over the period and Arrowstreet benefited from a number of selective purchases. Arrowstreet also had success with stock selection among European financial institutions despite the concerns surrounding the industry.

William Blair & Company, LLC underperformed the Benchmark for the 12 months ending June 30, 2011 and was the worst performing sub-adviser in the Underlying Fund for the reporting period. William Blair's performance suffered from poor stock selection across multiple sectors. Specifically, the Energy, Financial Services and Healthcare sectors were the most problematic for William Blair.

Risk

The overall risks of the Class are described in the prospectus. During the reporting period, there have been no changes to the Class that have materially affected the Class's risk profile. The Class's risk profile and the suitability of the investment remain as disclosed in the prospectus.

However, effective June 29, 2011 and as described in the Class's prospectus, the Russell Funds adopted a fund risk rating methodology recommended by the Investment Funds Institute of Canada (IFIC) to ensure consistency with the requirements of new National Instrument 81-101F3 "Mutual Fund Prospectus Disclosure - Contents of Fund Facts Document." Accordingly, the risk rating for the Class was changed from "average" to "medium" to match with IFIC's risk rating methodology and terminology.

Recent developments

On July 1st, 2010 British Columbia and Ontario adopted the Harmonized Sales Tax (HST) of 12% and 13% respectively. The Class is now required to pay an additional provincial tax on management fees and all operating expenses with the exception of filing fees. The levying of the HST is based on the province of the unitholders' residence. As such the Class is applying a blended HST rate based on the weighted average number of unitholders in each province for each Series in the Class. The HST is expected to result in an increase in the Class's management expense ratio.

Effective January 1, 2011, the Benchmark for the Class has been changed from the MSCI EAFE Index Net to the Russell Developed ex-North America Large Cap Index Net, which provides a more accurate representation of the markets in which the Underlying Fund invests.

International Financial Reporting Standards (IFRS) will replace Canadian Generally Accepted Accounting Principles (GAAP) for publicly accountable enterprises, which includes investment funds and other reporting issuers. On January 12, 2011, the Canadian Accounting Standards Board (ASB) made a decision to extend the deferral of IFRS adoption by investment companies for an additional year to January 1, 2013, which results in a two-year deferral for the adoption of IFRS compared with other publicly accountable entities. In preparation for meeting IFRS requirements, the Manager has taken the following steps:

- Established a working group to identify key differences between Canadian GAAP and IFRS, and to coordinate the transition to IFRS
- Identified areas where changes in disclosure will be required under IFRS standards
- Evaluated current information technology and reporting systems for IFRS readiness
- Assessed the likely effects on business activity and operational areas, such as internal controls, staffing and training requirements

Based on the current evaluation of the differences between Canadian GAAP and IFRS, the adoption of IFRS is expected to have no effect on the calculation of net assets or net asset value. IFRS is expected to affect the overall presentation of financial statements and result in additional disclosure in the accompanying notes. However, the Manager's current assessment of the effect of IFRS may change if new standards are issued or if the interpretations of current standards are revised.

* Based on the performance of Series B shares net of all fees and expenses paid by the Class. The return for Series E and Series F shares were 16.95% and 18.08% respectively. The returns of the Series of shares may differ as a result of varying fees and expenses. Please refer to the Series Description & Management Fees section for more details.

Russell Overseas Equity Class

Annual management report of fund performance

Related party transactions

Manager, Portfolio Manager and Principal Distributor

The Class is managed by Russell. Russell is a wholly owned subsidiary of Frank Russell Company ("FRC").

Russell provides or arranges for the provision of all general management and administrative services required by the Class in its day-to-day operations, including providing or arranging for the provision of investment advice, as well as bookkeeping, record-keeping and other administrative services for the Class.

Russell is the portfolio manager of the Class (the "Portfolio Manager"). Russell has entered into sub-adviser agreements with FRC and Russell Implementation Services Inc. ("RIS"), an affiliate, to provide services to the Class.

Russell also serves as distributor of the Class and has exclusive rights to distribute and arrange for the distribution of shares of the Class on a continuous basis in all provinces and territories in Canada in which shares of the Class are qualified for sale.

Russell receives a monthly management fee, based on the average net asset value of each series of shares of the Class, calculated daily and payable monthly.

Series description

The Class offers the following series of shares: Series B, E, F.

Series B shares have an annual management fee. The dealer is paid a trailer fee out of this management fee. Series E shares have a lower management fee. The dealer is paid a trailer fee out of this management fee.

Series F shares are sold only to investors enrolled in a fee-for-service or wrap program. These shares have a reduced management fee and do not pay trailer fees to the dealer. Instead, each investor negotiates a separate, ongoing fee that is paid directly to their dealer.

Management fees

The annual management fee paid by the Class is a percentage of the average daily net asset value of each series exclusive of any applicable taxes and operating expenses. The percentage is set out below:

Series B	Series E	Series F
2.50%	1.85%	1.00%

From these management fees, Russell pays other service providers, including distributors and sub-advisers. The major services expressed as a percentage are set out below.

	Percentage of management fees
Trailing and sales commissions	45%
Portfolio Manager expenses & other fees	55%

Financial highlights

The following tables show selected key financial information about the Class and are intended to help you understand the Class's financial performance for the years ended June 30.

Management expense ratio before waivers or absorptions	1.47%	1.56%	1.47%
Trading expense ratio (%) ⁽³⁾	0.15%	0.12%	0.17%
Portfolio turnover rate (%) ⁽⁴⁾	16.02%	22.25%	7.52%
Net asset value per share	\$ 12.21	\$ 10.34	\$ 10.37

* From October 27, 2008 to June 30, 2009

** From July 20, 2009 to June 30, 2010

- (1) The information is provided as at June 30 of the year shown.
- (2) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) including expenses indirectly incurred as a result of the Class's investment in the Underlying Fund(s), for the stated period and is expressed as an annualized percentage of daily average net asset value during the period.
- (3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period. The calculation of the trading expense ratio requires an investment fund that invests in securities of other investment funds to calculate the trading expense ratio by including commissions and other portfolio transaction costs that are attributable to its investment in each of the underlying investment funds.
- (4) The Class's portfolio turnover rate indicates how actively the Class's portfolio adviser manages its investments. A portfolio turnover rate of 100% is equivalent to the Class buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

Past performance

The past performance shows historical performance information for each series of shares of the Class. This information is provided to show past performance only and is not necessarily indicative of what may happen in the future.

The past performance information assumes that all distributions were re-invested in additional shares of the same series of the Class. The past performance information does not take into account sales, redemption, optional fees, income taxes or fees paid directly to Russell or your investment adviser that would have reduced returns or performance. Even if your distributions are reinvested you may have to pay tax on those distributions. Please consult your tax adviser.

Year-by-year returns

The following charts show the annual performance of each series of shares for each of the years ended June 30. The start date used in this Past Performance section is the date the series were first made available to the public, whereas, the start date disclosed in the Financial Highlights section, is the formation date.

The charts also illustrate how the Class's performance has changed from year to year, and show, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year.

Year-by-year returns – Series B

*From October 31, 2008 to June 30, 2009 (not annualized)

Year-by-year returns – Series E

*From July 31, 2009 to June 30, 2010 (not annualized)

Year-by-year returns – Series F

*From October 31, 2008 to June 30, 2009 (not annualized)
