

SEMI-ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE

Russell Money Market Class

DECEMBER 31, 2011

This semi-annual management report of fund performance contains financial highlights but does not contain the complete unaudited semi-annual financial statements of the Class. You may also obtain an additional copy of the semi-annual management report of fund performance and the semi-annual financial statements by visiting our website or SEDAR's website at www.sedar.com. You can request a copy of the Class's proxy voting policies and procedures, proxy voting record or quarterly portfolio disclosure at no cost by: calling 1-888-509-1792; visiting our website at www.russell.com/ca; or writing to us at: Russell Investments Canada Limited, 100 King Street West, 1 First Canadian Place, Suite 5900, Toronto, Ontario M5X 1E4.

This report may contain forward-looking statements about the Class, its strategy, expected performance and condition. Forward-looking statements are statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "plans", "believes", "estimates" or negative versions thereof and similar expressions. In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risk, uncertainties and assumptions about the Class and economic factors. Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Class. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors, interest and foreign exchange rates, capital markets, business competition, technological change, changes in government regulations, unexpected judicial or regulatory proceedings, and catastrophic events.

We stress the above-mentioned list is not exhaustive. We encourage you to consider these and other factors carefully before making any investment decisions and we urge you to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Class has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise.

Russell Money Market Class

Semi-Annual management report of fund performance

Investment objective and strategies

The Class's investment objective is to provide the maximum current income that is consistent with preservation of capital and liquidity by obtaining exposure primarily to Canadian money market securities and financial instruments.

To achieve this objective, the Class invests in units of the Russell Money Market Pool (the "Underlying Fund").

The Class's investment in the Underlying Fund provides access to diversification that allocates among asset classes, investment styles and sub-advisers.

The current benchmark of the Class, against which its performance is compared, is the DEX 30-Day T-Bill ("Benchmark"). Each sub-adviser may have a different sub-adviser benchmark allocated to it in respect of the assets of the Underlying Fund managed by that sub-adviser that better reflects the investment style or market segment of that sub-adviser.

Results of operations

For the six-month reporting period ending December 31, 2011, the Russell Money Market Class (the Class) returned 0.12%*, while its Benchmark, the DEX 30-Day T-Bill Index, returned 0.44%.

During the reporting period, the Class's net assets increased by \$7.2 million, as a result of net subscriptions of \$7.2 million. Net investment income for the Class is comprised of total investment income earned by securities less the expenses of the Class. The Class's total investment income for this period was \$31 thousand compared with total investment income of \$50 thousand in the previous reporting period. The Class's expenses decreased by \$20 thousand (approximately 34%) from the previous period's expenses. The decrease is mainly due to a decrease in management fees paid as a result of the lower average net assets of the Class.

Financial markets endured elevated levels of volatility during the reporting period driven largely by global economic concerns. These ranged from the ongoing European sovereign debt crisis and the sluggish U.S. economy to the potential for a severe slowdown in China's economy in response to slowing global economic growth. While equity markets struggled markedly during the third quarter of 2011 as risk aversion was front and centre, the reverse was true for fixed-income markets. The steady stream of negative news led to extreme volatility across global financial markets, which caused a flight-to-safety by investors into developed government bond markets, including Canada. However, yields on Government of Canada T-Bills were largely unchanged during the period. Although economic indicators in the U.S. improved during the fourth quarter, the Bank of Canada and the U.S. Federal Reserve Board kept their level of interest rates, unchanged at 1.00% and 0.00% to 0.25% respectively.

For the six-month reporting period, the Underlying Fund underperformed the Benchmark net of fees. The Underlying Fund's exposure to Government of Canada T-Bills with longer terms allowed for a higher average yield than the Benchmark and this contributed positively to performance. In addition, the Underlying Fund had exposure to Provincial bonds with terms of less than one-year, which also added to the Underlying Fund's return.

Risk

The overall risks of the Class are described in the prospectus. During the reporting period, there have been no changes to the Class that have materially affected the Class's risk profile. The Class's risk profile and the suitability of the investment remain as disclosed in the prospectus.

However, effective June 29, 2011 and as described in the Class's prospectus, the Russell Funds adopted a fund risk rating methodology recommended by the Investment Funds Institute of Canada (IFIC) to ensure consistency with the requirements of new National Instrument 81-101F3 "Mutual Fund Prospectus Disclosure - Contents of Fund Facts Document." Accordingly, the risk rating for the Class was changed from "very low" to "low" to match with IFIC's risk rating methodology and terminology.

Recent developments

As of December 31, 2011, the Underlying Fund remains conservatively positioned in anticipation of a prolonged period of slow economic growth, which should result in central banks keeping short-term rates at exceptionally low levels. The Underlying Fund continues to maintain its yield at levels higher than that of the Benchmark through greater exposure to longer-term Government of Canada T-Bills than the Benchmark.

International Financial Reporting Standards (IFRS) will replace Canadian Generally Accepted Accounting Principles (GAAP) for publicly accountable enterprises, which includes investment funds and other reporting issuers. On January 12, 2011, the Canadian Accounting Standards Board (ASB) made a decision to extend the deferral of IFRS adoption by investment companies for an additional year to January 1, 2013. At its December 12, 2011 meeting the ASB decided to further extend the deferral to January 1, 2014. The ASB expects to issue the amendment in March 2012.

In preparation for meeting IFRS requirements, the Manager has taken the following steps:

- Established a working group to identify key differences between Canadian GAAP and IFRS, and to coordinate the transition to IFRS
- Identified areas where changes in disclosure will be required under IFRS standards
- Evaluated current information technology and reporting systems for IFRS readiness
- Assessed the likely effects on business activity and operational areas, such as internal controls, staffing and training requirements

Based on the current evaluation of the differences between Canadian GAAP and IFRS, the adoption of IFRS is expected to have minimal effect on the calculation of net assets or net asset value. IFRS is expected to affect the overall presentation of financial statements and result in additional disclosure in the accompanying notes. However, the Manager's current assessment of the effect of IFRS may change if new standards are issued or if the interpretations of current standards are revised.

Related party transactions

Manager, Portfolio Manager and Principal Distributor

The Class is managed by Russell. Russell is a wholly owned subsidiary of Frank Russell Company ("FRC").

Russell provides or arranges for the provision of all general management and administrative services required by the Class in its day-to-day operations, including providing or arranging for the provision of investment advice, as well as bookkeeping, record-keeping and other administrative services for the Class.

Russell is the portfolio manager of the Class (the "Portfolio Manager"). Russell has entered into sub-adviser agreements with FRC, Russell Investment Management Company ("RIMCo") and Russell Implementation Services Inc. ("RIS"), an affiliate, to provide services to the Class.

Russell also serves as distributor of the Class and has exclusive rights to distribute and arrange for the distribution of shares of the Class on a continuous basis in all provinces and territories in Canada in which shares of the Class are qualified for sale.

Russell receives a monthly management fee, based on the average net asset value of each series of shares of the Class, calculated daily and payable monthly.

Series description

The Class offers the following series of shares: Series B, E, F.

Series B shares have an annual management fee. The dealer is paid a trailer fee out of this management fee. Series E shares have a lower management fee. The

* Based on the performance of Series B shares net of all fees and expenses paid by the Class. The return for Series E and Series F shares were 0.20% and 0.20% respectively. The returns of the Series of shares may differ as a result of varying fees and expenses. Please refer to the Series Description & Management Fees section for more details.

Russell Money Market Class

Semi-Annual management report of fund performance

dealer is paid a trailer fee out of this management fee.

Series F shares are sold only to investors enrolled in a fee-for-service or wrap program. These shares have a reduced management fee and do not pay trailer fees to the dealer. Instead, each investor negotiates a separate, ongoing fee that is paid directly to their dealer.

Management fees

The annual management fee paid by the Class is a percentage of the average daily net asset value of each series exclusive of any applicable taxes and operating expenses. The percentage is set out below:

Series B	Series E	Series F
0.65%	0.50%	0.50%

From these management fees, Russell pays other service providers, including distributors and sub-advisers. The major services expressed as a percentage are set out below.

	Percentage of management fees
Trailing and sales commissions	47%
Portfolio Manager expenses & other fees	53%

Financial highlights

Net asset value per share	\$ 10.06	\$ 10.04	\$ 10.02	\$ 10.03

* From October 27, 2008 to June 30, 2009

** From July 20, 2009 to June 30, 2010

- (1) The information is provided as at June 30 of the year shown and for the six months ended December 31.
- (2) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) including expenses indirectly incurred as a result of the Class's investment in the Underlying Fund(s), for the stated period and is expressed as an annualized percentage of daily average net asset value during the period.
- (3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period. The calculation of the trading expense ratio requires an investment fund that invests in securities of other investment funds to calculate the trading expense ratio by including commissions and other portfolio transaction costs that are attributable to its investment in each of the underlying investment funds.
- (4) The Class's portfolio turnover rate indicates how actively the Class's portfolio adviser manages its investments. A portfolio turnover rate of 100% is equivalent to the Class buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high portfolio turnover rate and the performance of a fund.

Past performance

The past performance shows historical performance information for each series of shares of the Class. This information is provided to show past performance only and is not necessarily indicative of what may happen in the future.

The past performance information assumes that all distributions were re-invested in additional shares of the same series of the Class. The past performance information does not take into account sales, redemption, optional fees, income taxes or fees paid directly to Russell or your investment adviser that would have reduced returns or performance. Even if your distributions are reinvested you may have to pay tax on those distributions. Please consult your tax adviser.

Year-by-year returns

The following charts show the annual performance of each series of shares for each of the years ended June 30 and includes the performance for the last six months ending December 31, 2011. The start date used in this Past Performance section is the date the series were first made available to the public, whereas, the start date disclosed in the Financial Highlights section, is the formation date.

The charts also illustrate how the Class's performance has changed from year to year and in the last six months, and show, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year and in the last six months.
