

Build. Deliver.

“Russell’s DC solutions make investment decisions easy for members and their pension scheme’s trustees.”

Most Defined Contribution (DC) pension scheme members like the idea of choosing from the world’s best managers for their pension savings. Choice is good, as are the diversification benefits of investing with multiple managers. Although when confronted by too many options, people can be overwhelmed.

Russell’s multi-manager funds give DC pension scheme investors access to some of the world’s best investment managers in a single, risk-controlled package. Our solutions help keep participants from making common investment mistakes: poor asset allocation, chasing performance and inadequate diversification.

DC members in Russell funds benefit from the skills and experience of our manager selection experts. Our continuous monitoring provides comfort that managers will be changed when necessary. DC investors can therefore rest assured that their assets are always managed by high quality managers.

Russell funds feature on a number of administration platforms for clients who prefer to work with separate investment management and administration. Alternatively, Russell’s strategic alliance with Zurich Assurance delivers one solution integrating Russell’s multi-manager expertise and Zurich’s administration capabilities. Either way, Russell multi-manager funds are the ideal platform for building a financially secure retirement.

Key Benefits.

- 1) Added value via access to some of the world’s best managers in a single risk-controlled package.
- 2) Consistent performance through Russell’s expertise in combining managers in multi-manager funds, which are continuously monitored and enhanced.
- 3) Simple choices for members.
- 4) Easy administration for trustees.
